IRAKAS-PROZESUAN ERABILTZEN DEN METODOLOGIA

The methodology will be essentially communicative, oriented toward practice, to the use of language. Students, as future users of the language, must be able to develop the necessary skills to perform linguistic processing activities, both in understanding and expression. Even though the reading and writing skills are practised, students are especially encouraged to take part in the classes to focus on the communicative ones, listening and speaking.

Therefore, the teaching and learning activities will focus primarily on those to which the students will face in real communication situations, that is, comprehension activities, production, interaction and mediation, through tasks that involve such activities.
